He has a wife and five children. Brooding over the state of affairs brought about by unemployment he believed to have rendered him desperate.

When the foreigner applied to Superintendent Simmons for work he was told there was nothing to which he could be assigned steadily. The superintendent offered to put him to work for a time a while-waiting his was not satisfactory to Machauda. Words followed.

As the superintendent turned his back on Machauda the latter drew on his pocket a .38 calibre weapon and began firing. Only one shot took effect. As the superintendent fell workers about the plant rushed in and overpowered and arrested the gunman. He was taken to jail at Uniontown by state police while the wounded man was rushed to the Uniontown hospital.

The procession formed on the South Side and covered the principal streets on both sides of the city before disbanding. The parade was one of many colorful and varied uniforms of the firefighters never allowing the sight of marching men passing a review to become monotonous. There was a good sprinkling of bands and considerable fire equipment in line also. Sharpsburg had the greatest number of men in line. A company of 61 marchers followed the Westinghouse Air Brake band of Wilmerding. The Extra contingent had the second largest turnout. Other companies were well represented but did not have such long lines of marchers. In the parade 21 companies were represented but there were a large number of firemen from various parts of Western Pennsylvania who did not participate. Among these were Major Swissvale Pittsburg Avalon East View Keokup New Kensington and Brownsville.

There were eight bands and two drum corps. Local musical organizations were also hired to play. The parade formed in three different sections. **DEAD FISH IN RIVER**  
Numbers of Them Seen in and Along Banks of the Stream Here.

Quantities of dead fish were seen yesterday along the river banks within a few miles giving rise to the report that the tannery at Confluence had again drained its poisonous waste into the stream. The tannery so far as is known here has not been in operation for a long time. What other source of pollution could cause the death of so many of the stream is a mystery unless it be the sulphur acid laden waters of the Casselman river which seems hardly probable in view of the fact that the trout brookery has often been lower than at present with an equal quantity of sulphur water pouring in from the Casselman.

The Fayette County Home-Coming celebration is over. The last thing now is to count the cost. To this task the central committee and its members of the finance committee will set themselves early in the coming week. It is probable in a general way this was done before the event but as in any big undertaking there are things unforeseen which must be accounted for afterward. That it was not a money making venture may be taken for granted. The possibility loomed today of the committee facing a deficit. This will not be known however for several days.

#### THE PARAMOUNT.

"THE CRIMSON GARDENIA"—One of Rex Beach's creations, starring Hedda Nova, is being shown today. This is a real Rex Beach tale. The screening of this story has lost nothing, and even gained for it a certain amount of color. Owen Moore portrays with rare skill the adventures of Roland Van Dam, who comes to the Mardi Gras in New Orleans, to seek adventure and finds it galore, as the result of innocently wearing a gardenia pinned on his breast by an old flower seller. This attracts the attention of Madeleine Dorette who thinks the masked man is her cousin, a fugitive from justice whom she has never seen, but with whom she has a rendezvous. He has agreed to wear a gardenia to make his identification plain. She therefore joins Roland and they stroll together. Thus the complications begin, which end quickly in an attack on Roland and in the death of the cousin, whose gardenia is incriminated by his assassination and thus gives the name to the story. Madeleine is finally disillusioned of the unhappy idea that she has been responsible for her cousin's death, and turns back to Roland. A selected comedy is also being shown. Both attractions will be presented tomorrow.

#### THE SOISSON.

"THOU SHALT NOT"—A William Fox production, featuring Evelyn Nesbit in her latest release, is today's attraction. Miss Nesbit is seen as a

young, innocent choir singer, who is led astray by a man under promise to marry. He lures her, only to desert her. It is a simple, sincere story, said to have been taken from real life by Director Charles J. Brabin, who wrote the tale as well as the scenario. The young girl is found by her minister, who induces her to return home, in the role of Magdalen. This powerful photodrama has proved to be an eye opener for harsh fathers, thoughtless mothers and young innocent girls, and in it Miss Nesbit has the best role of her motion picture career. The wide and sympathetic appeal of the subject displays Miss Nesbit's talents at their best. Supporting Miss Nesbit are Ned Burton, Florida Kingsley, Gladys James, Crawford Kent and Eddie Lawrence. A delightful comedy is also being shown. Mary Pickford, the idol of the screen, will be presented soon.

## OVEN GAINS PREVENTED A BIG HOLIDAY LOSS IN PRODUCTION

Active List Increased by 1,368, Largely by the Frick Company.

### SHOWING WAS A SURPRISE

The Expectation Having Been That the Usual Slump Would Follow Celebration of Nation's Birthday, Market Feels a Strengthening Influence.

From The Weekly Courier

The loss in production of coke incident to the region's general observance of Independence Day was a more protracted observance of it by individual workers, was largely compensated by the additions to the number of producing ovens. Normally the decrease would have been close to 25 per cent but compared with that of the preceding week it was but only 17 per cent. Statistics of production show that the curtailment for the week was only 7,800 tons. Had not 1,368 ovens been brought to approximately full production during the week, the lost tonnage would have been the 20,000 mark taking previous year as a basis of calculation.

The showing is somewhat of a surprise in the region and perhaps outside of it as well, the expectation being that a greater slump than usual would mark this year's celebration of the nation's birthday. In the week preceding buying of coke against the prospective post-fourth shoring was very active but notwithstanding there appears to be no accumulation, or even excess day-to-day production, that is without a consumer or consumers somewhere in waiting, or at least willing to receive it.

In consequence it is noticeable that, although the market is relatively quiet, coke is not being picked up without some effort on part of buyers. This has a strengthening influence and price for spot furnace holds to \$4.00 as the minimum in some cases and at \$4.25 in others.

There have been rather more inquiries for by-product coal during the past week, indicating a larger demand as likely to develop early. This is doubtless a reflection of the "buy early" movement and reveals a desire upon the part of certain by-product coke producers to make additions to coal stocks which have become, or are shortly to become, somewhat depleted.

Estimated production of coke during the week ending Saturday, July 5, was 130,790 tons. The Connellsville district is credited with 79,040 a decrease of 4,533 tons, the Lower Connellsville district with 51,750 a decrease of 3,310 tons, or a regional decrease of 7,843 tons. The change to the merchant list of the plants of the Otter & Snyder Steel Company alters the proportion of contribution by the two ovens groups and affected the totals for the week, furnace production having been 72,130, a loss of 7,903 tons, and merchant production 58,660, a gain of 60 tons.

Of the 1,368 ovens blown in 1,154 were at the plants of the H. C. Frick Coke company and 214 at merchant plants. The Frick additions embraced firing up 188 ovens at Mammoth, 200 at Marguerite, 300 at Colonial No. 1, and 126 at Colonial No. 3, all four of which have been idle for several months. Other additions ranged from 10 to 50 ovens at a dozen different plants. The principal merchant oven gain was at American No. 2, where 120 were placed in blast.

## SAVED SAM'L. OAKS FROM TERRIBLE CASE OF ILLNESS

Twins Nerv-Worth Did This For Prospective Street Vain and He Tells About It

This is the latest Nerv-Worth endorsement to be received by the Connellsville Drug Company. In source and character it is a telling statement.

Connellsville Drug Company—For twenty years I have doctored and taken all kinds of remedies for nervousness, sleeplessness, stomach trouble and indigestion, without relief whatever. My legs ached and I felt weak, tired and listless. Did not have the nerve force to get myself together or digest my food. I procured a bottle of Nerv-Worth and took it as directed and all these troubles left me, and I am feeling strong and vigorous.

One evening I was suddenly stricken with a pain over my left eye. I got so cold I could not get anything to warm me up. Had a severe pain in my left leg. Went to bed and then I thought I would turn up. I commenced taking Nerv-Worth and soon gained relief and am feeling fine now. I certainly headed off the "flu" before it got a head start on me. I am very enthusiastic about Nerv-Worth as it saved me a terrible sickness and possibly death.

Your dollar back at the Connellsville Drug Company if Nerv-Worth does not benefit you. The Broadway Drug Company is Nerv-Worth in Scotland—Adv.

### COKE TRADE SUMMARY.

The slump in coke production following the observance of Independence Day was an agreeable surprise in that it was very much less than had been expected. On the basis of previous years it would have been at least 25 per cent from normal output, but such shrinkage as occurred was only about 17 per cent. That it was not greater was due to the large gain in the number of ovens that were brought to approximately full production during the week. These totaled 1,368 of which 1,154 were at plants of the H. C. Frick Coke company and 214 at merchant plants.

Production for the week was 130,790 tons which was but 7,843 tons below that of the preceding week. Had there been no increase in the number of producing ovens the slump would have been at least 20,000 tons basing calculations on the records of previous years, excepting 1914 when the slump would have been at least 20,000 tons on the basis of calculation.

The active buying which developed preceding the Fourth took all the coke in sight more in fact than was in the region so that the condition today is that the region is practically free of coke accumulations. This has had a strengthening influence on the market and spot furnace addresses close to \$4.00 to \$4.25 as the minimum. Forestry has developed rather more strength than furnace all \$4.50 coke having disappeared from the market making \$4.75 being the low mark in the schedule.

## RAILROAD DEFICIT IN MAY SHOWED A MARKED DECREASE

Total for First Five Months of 1936 Was \$213,000,000; Operating Income Was 16 Per Cent Less.

The May deficit incurred in the operation of railroads under government control decreased from the \$43,500,000 average of the first four months of this year to \$29,000,000, according to unofficial figures made public by the bureau of railroad economics. Net operating income totaled \$38,530,000 compared with the government's rental obligation of \$77,426,000. The total deficit aggregates \$213,000,000 for the five months of 1936, not including "miscellaneous" expenses of the railroad administration.

Compared with net operating income in May last year, a decrease of \$32,369,000 or 46.41 per cent, was shown this year although gross operating revenues increased from \$373,397,000 to \$407,942,000 or 9.23 per cent. The disproportionate increase in operating expenses from \$282,791,000 to \$359,861,000, or more than \$76,000,000 caused the decrease in net revenues. While the volume of freight traffic last May was shown to be 15.5 per cent below the high volume in May, 1935, it was estimated to have been only one-third of 1 per cent less than the average volume for May during the three-year period of operation prior to government control.

Passenger traffic last May was shown to be 30 per cent, in excess of the average traffic during that period yielding 70 per cent greater revenues with the high passenger rates put into effect during the period of government control. The average daily operating expenses last May decreased a little more than \$112,000 from the January daily average of \$11,628,000.

## "IT DOES THE WORK," SAYS MRS. SCHOCH

Mrs. M. C. Schoch, 246 Broadway Ave., Phila., tells of her great results that came to her husband. His stomach and kidneys caused him to suffer and his entire system was all run down. ## Hot Tea and Frozen Cream Very Constipating

THERE is little inclination for solid food on a hot day. Cold drinks and ices, salads and pastry form much of the diet, especially among women. This lack of wholesome variety, however, interferes with proper digestion.

The result is biliousness, bulimous, dizzy spells. The cause is constipation. The stomach could not digest nor the bowels pass off the day's strange mixture of food and drink.

A simple way of overcoming the trouble is that if you have not already got Dr. Caldwell's Syrup Pepsin in the house, go to a drug store and buy a 50c or \$1 bottle. Take a teaspoonful tonight before you go to bed. It will act in the morning, and immediately thereafter your

head will be clear and that feeling of oppression will be gone.

Syrup Pepsin is a combination of simple laxative herbs with pepsin. It acts on the stomach muscles training them to do their work naturally so that medicines can be dispensed with. It is the most widely used laxative compound in the world. That means merit.

A free sample bottle can be had by sending your address to Dr. V. B. Caldwell, 480 Washington St., Monticello, Ill.

Purchasers license authorizing the purchase and possession of explosives and ingredients.

Foreman's license authorizing the purchase and possession of explosives and ingredients and the sale and issuance of explosives and ingredients to workmen.

Exporters license authorizing the licensee to export explosives but no such license shall authorize exportation in violation of any proclamation of the President issued under an act of Congress.

### CONFERENCE PLANNED.

May Authorize Meeting of Representatives or Capital and Labor.

Identical resolutions have been introduced in the Senate by Senator Poindexter, of Washington, and in the House by Representative Kelly of Pennsylvania.

## BUYING OF PIG IRON

Was Active in June; Highest Selling Month Since Armistice.

Over a million and a half tons of pig iron were placed with blast furnaces in June throughout the country, says Cleveland Daily Iron Trade.

In fact, June was the liveliest pig iron-selling month since the armistice was signed on November 11, 1918. The buying was not confined to any one grade nor to any one section of the country. However, foundry and machine grades made up by far the bulk of the buying and Cleveland, Chicago and Buffalo were the most active spots in the market in the month just passed.

The cold air was polluted with steam, and she snuffed it with snuffles, and trembled to the soul, with envious jingling of sleigh bells. Boys and girls, all aglow with panting jets of vapor, darted at the passing sleighs to ride on the runners or sought to rope their sleds to any vehicle whatever, but the fleetest no more than just touched the flying carter, though a hundred soggy mittens grasped for it, then reeled and whirled till sometimes the wearers of the darning mittens plunged flat in the snow and lay a sprawl, reflecting:

It was vaguely like a topee strutt, but cumbersome with unwholesome exorcisements of force and off, while underneath were spinning leather bells and something whirled that whurred and howled and seemed to stagger. The ride-stealers made no attempt to fasten their sleds to a carter's trivance so nondescript and yet so fearsome.
